ABSTRACT

Output of college level manpower (supply) is one of the two major subjects upon which the Southern Regional Education Board project on manpower and education seeks to provide information. The present report is designed as a reference for application to problems in higher educational planning and decisionmaking. Highlights of the report include: (1) Institutions in SREB states in 1971-72 awarded 225,477 bachelor's degrees, 5,739 master's degrees, 10,658 first professional degrees, and 6,529 doctoral degrees. (2) Of all bachelor's degrees awarded in the South, 58.1 percent were in the fields of education, business and management, and social sciences. (3) In the South, the number of degrees awarded in 1971-72 increased over 1970-71 by 5.1 percent at the bachelor's level. (4) Large increases in degrees awarded for fields in which the South's share of the nation's output is already high were noted at the bachelor's level in home economics and communications. (5) Number of degrees awarded per program in the South rose from 20.8 to 21.2 at the bachelor's level, from 12.3 to 13.4 at the master's level, from 5.0 to 5.3 at the doctoral level, and from 106.9 to 117.1 at the first professional level. HIGHLIGHTS

1. Institutions in SREB states in 1971-72 awarded 225,477 bachelor's degrees, 52,739 master's degrees, 10,658 first professional degrees and 6,529 doctoral degrees.

2. Of all bachelor's degrees awarded in the South, 58.1% were in the fields of education (56,039), business and management (39,463) and social sciences (35,509). Of all master's degrees, 61.3% were in the fields of education (23,724), business and management (5,293) and social sciences (3,291). Of all doctoral degrees, 48.5% were in the fields of education (1,596), physical sciences (790) and biological sciences (782). First professional degrees requiring at least six years of study included law (5,279), the health professions (4,053) and theology (1,526).

3. In the South, the number of degrees awarded in 1971-72 increased over 1970-71 by 5.1% at the bachelor's level, 14.2% at the master's level, 12.0% at the first professional level and 7.7% at the doctoral level.

4. Declines in degrees awarded in the South were noted at one or more degree levels in the fields of mathematics, physical sciences, foreign languages, letters, social sciences, home economics, biological sciences, agriculture and communications.

5. Large increases in degrees awarded for fields in which the South's share of the nation's output is already high were noted at the bachelor's level in home economics and communications; at the master's level in home economics, the health professions, agriculture and education; and at the doctoral and first professional level in law, psychology, education and business and management.

6. Number of degrees awarded per program in the South rose from 20.8 to 21.2 at the bachelor's level, from 12.3 to 13.4 at the master's level, from 5.0 to 5.3 at the doctoral level and from 106.9 to 117.1 at the first professional level.

Degree Output in the South
1971-72

FOREWORD

This is the fourth report by the Southern Regional Education Board providing regional tabulations from national surveys of earned degrees conducted by the U. S. Office of Education.

When the Board published Academic Degrees Awarded in the Southern States, 1963-64, it emphasized application to curriculum planning and interinstitutional cooperation. The report for 1965-66 and 1968-69, Advanced Degree Output and Productivity in the South, gives primary attention to assessment of productivity in graduate education while Degree Output in the South 1970-71 highlights the prospect that states might develop arrangements for sharing of scarce higher educational resources.

The present report for 1971-72 is the first SREB degree report since the Board launched its project on manpower and education, under partial funding by the Exxon Education Foundation. It is therefore fitting that the introductory discussion emphasizes degree output statistics as the supply side of a manpower frame of reference. Readers who are interested in pursuing the larger subject of manpower information applied to higher educational problems will be interested in securing the Board's reports on special fields and its comprehensive estimates of manpower requirements.

Winfred L. Godwin
President

INTRODUCTION

Degree Output in the South, 1970-71, published by SREB in 1973, reported the supply of college level manpower according to a classification system or taxonomy newly adopted by the U. S. Office of Education. The present publication represents the second year of reporting under this system.

Output of college level manpower (supply) is one of two major subjects upon which the Southern Regional Education Board project on manpower and education seeks to provide information. The other subject is occupational openings for which college level manpower qualifies (demand). The present report, which concerns the first of these, is designed as a reference for application to problems in higher educational planning and decision-making.

Two dimensions for viewing the production of college degrees are (1) variation in rate of production, by fields, and (2) relation of regional output of a field to output by the nation. Examination of these two aspects should be useful in a time when the number of graduates prepared for many white collar occupational outlets may have begun to outstrip demand. Summary distributions of graduates in major fields of study are displayed in Tables B, C, and D to provide an overview and for possible comparison with data on differences in demand.

The bachelor's degree fields arrayed in Table A may be viewed in four categories: (1) fields in which the South produces a high proportion of the nation's degrees (25.2% to 33.8%) and in which output continues to increase; (2) fields in which the South produces a high proportion of the nation's degrees and in which output declined during the interval 1970-71 to 1971-72; (3) fields in which a lesser share of the nation's degrees is produced in the South (16.1% to 25.1%) and in which output continues to increase; (4) fields in which a lesser share is produced and in which degree output dropped off during the interval 1970-71 to 1971-72.

As indicated in Table B, the first category (high share of nation's output and increasing), includes the two fields of largest output--education (up 8.5%) and business and management (up 5.1%)--as well as home economics (up 14.5%), communications (up 13.9%), agriculture (up 7.7%), and theology (up 2.9%).

TABLE A

Bachelor's Degrees Awarded in the SREB States, 1971-72;
Number; Percent of U. S.; 1970-71 to
1971-72 Percent Change

	Number of Degrees	Percent of United States	Percent Change 1970-71 to 1971-72
Theology	1,308	33.8	2.9
Business & Management	39,463	32.0	5.1
Education	56,039	29.1	8.5
Agriculture	3,931	29.0	7.7
Home economics	3,303	27.2	14.5
Communications	3,278	26.6	13.9
Mathematics	6,105	25.6	-9.2
Architecture & design	1,620	25.1	14.7
Health professions	7,167	24.8	18.5
Computer & information sciences	834	24.5	39.9
Biological sciences	9,137	24.3	3.1
Public affairs & services	3,082	24.2	60.8
Engineering	12,006	23.3	3.1
Physical sciences	4,687	22.4	-6.1
Social sciences	35,509	22.2	-0.9
Letters	15,192	20.7	-4.6
Psychology	8,824	20.3	10.1
Fine and applied arts	6,777	20.0	20.8
Foreign languages	3,449	17.8	-5.5
Area studies	457	16.3	31.7
Interdisciplinary studies	2,689	16.1	11.6
All fields	225,477*	25.2	5.1

*Includes bachelor's degree in law (190), library science (404), and military science (26), degrees not listed above.

TABLE B

Bachelor's Degrees Awarded in the SREB States, 1971-72; by Categories; 1970-71 to 1971-72 Percent Change

I. High share of nation's output (25.2% - 33.8%) and increasing (47.7% of all bachelor's degrees in region):

	Percent Change 1970-71 to 1971-72
Home economics	14.5%
Communications	13.9
Education	8.5
Agriculture	7.7
Business and management	5.1
Theology	2.9

II. High share of nation's output and declining:

Mathematics	-9.2

III. Lesser share of nation's output (16.1% to 25.1%) and increasing (23.4% of bachelor's degrees in region):

Public affairs and services	60.8
Computer and information sciences	39.9
Area studies	31.7
Fine and applied arts	20.8
Health professions	18.5
Architecture and design	14.7
Interdisciplinary studies	11.6
Psychology	10.1
Biological sciences	3.1
Engineering	3.1

IV. Lesser share of nation's output (16.1% to 25.1%) and declining (26.2% of all bachelor's degrees):

Physical sciences	-6.1
Foreign languages	-5.5
Letters	-4.6
Social sciences	-0.9

The second category (high share and declining) includes only mathematics.

The third category (lower share and increasing) includes 10 major fields, some gaining strongly from 1970-71 to 1971-72.

The fourth category of fields (lower share and in numerical decline) accounts for 26.2% of all bachelor's degrees. This consists of the social sciences (down 0.9%) and letters, including English (down 4.6%), the physical sciences (down 6.1%) and foreign languages (down 5.5%).

A rationale for this kind of display is to "flag" fields of study which should be watched in a period when some academic fields may be approaching saturation of the job market. This bachelor's degree display, e.g., reveals home economics, and communications (including journalism) as fields both high in share of the nation's output and high in rate of continuing expansion. In the absence of data on demand, this information does not, of course, indicate actual levels of job opportunity for these fields; it merely suggests the possibility of potential overproduction. Similarly, the fields which are declining in output (mathematics, physical sciences, foreign languages, letters and social sciences) are not rated in terms of employment prospects on the basis of these data. The reader will perhaps speculate whether such reductions reflect enrollment declines responding to earlier tightening of demand. However, these declines do not reveal the nature of the current job outlook in these areas.

As a matter of fact there is empirical, although limited, knowledge about the labor market experience of this class of the nation's graduates in the form of an October, 1972 survey conducted by the Bureau of the Census for the Bureau of Labor Statistics.[1] The study reports for five broad fields of study. One finding is that there were significant differences in rates of unemployment--16.0% for the social sciences, 15.4% for the humanities, 7.6% for education, 5.2% for business or commerce and 6.9% for all other fields. The rate was 11.7% for all baccalaureates, compared with 2.6% for those with master's degrees; no estimate was given for doctorates because of sample size. This compares with an overall unemployment rate of 5.6% in the nation in 1972. A further finding relating to the nature of employment opportunities is the

---

[1] U. S. Department of Labor, Special Labor Force Report 169, "Employment of Recent College Graduates, October, 1972," 1974.

distribution of survey respondents who reported having accepted employment unrelated to their field of study. These percentages were 31.1% for those who had studied the humanities, 28.9% for those in the social sciences, 14.7% for those in business or commerce, 11.4% for those in education and 18.2% for all others. One concludes that for these four broad areas, job opportunities were best in business or commerce, followed by education and then by the humanities and the social sciences.

While these gross classifications by field do not permit direct comparison with the degree output data, it may be noted that several of the fields declining in output of degrees from 1971 to 1972 coincided with fields also identified by the Bureau of the Census as low in employability--namely, fields in the humanities and the social sciences. Does this constitute evidence that student choice does respond to changes in the job market outlook?

Congruence between the pattern observed at the bachelor's level of degree production and at the master's level is indicated in Table C, showing fields identically classified as well as exceptions. The 1972 overall increase in master's degree production was 14.2% in the South, compared to 9.2% in the nation. Master's degrees in education, which account for 45.0% of the total, increased 18.0%.

The production of doctorates and first professional degrees over this two-year period (up 7.7% in the South compared to 3.9% in the nation) is marked by downward shifts for several fields in which the South has been a relatively heavy producer (Table D), namely in home economics, the biological sciences, agriculture and mathematics (Category II). Category I of doctoral and first professional degrees (high share, still increasing) bears watching in a time of shrinking opportunity--including as it does such crowded fields as law and education.

Obviously, this display of information on the supply of college level manpower has limited application in the absence of equally detailed information about demand for college level manpower. The Board, in its manpower and education programs, will be issuing reports aimed at satisfying the need for such information.

With growing concern for educational accountability, it is likely that the manpower dimension will receive increasing emphasis in educational planning. There is a highly influential educational point of view which still seeks to dispose of the so-called "manpower approach" by calling attention to the inaccuracies

TABLE C

Master's Degrees Awarded in the SREB States, 1971-72; by Categories; 1970-71 to 1971-72 Percent Change

I. High share of nation's output (21.0% to 28.6%) and increasing (58.6% of master's degrees in region):

	Percent Change 1970-71 to 1971-72
*Home economics (376 degrees awarded in 1971-72)	29.2
Health professions (1,696)	27.8
*Agriculture (769)	21.5
*Education (23,724)	15.0
Interdisciplinary studies (455)	12.1
Library science (1,589)	8.4
*Theology (756)	6.5
Biological sciences (1,485)	5.3

II. High share of nation's output and declining (no fields at master's level)

III. Lesser share of nation's output (11.7% to 21.0%) but increasing (33.5% of master's degrees in region):

*Computer and information sciences (279)	69.1
*Architecture and design (323)	28.2
Fine and applied arts (1,119)	26.7
*Public affairs and services (1,728)	26.4
Business and management (5,293)	26.3
Communications (302)	21.8
Social sciences (3,291)	14.6
*Psychology (1,067)	13.6
*Engineering (3,032)	6.6
Mathematics (1,081)	4.5
*Area studies (114)	1.8

IV. Lesser share of nation's output (13.2% to 21.0%) and declining (7.9% of master's degrees in region):

*Foreign languages (614)	-14.5
*Physical sciences (1,187)	-0.3
*Letters (2,368)	-0.3

*Classified similarly at bachelor's level.
Note: Master's degree in law (93) not listed.

x

TABLE D

Doctor's and First Professional Degrees Awarded in the SREB States, 1971-72; by Categories; 1970-71 to 1971-72 Percent Change

I. High share of nation's output (21.0% to 26.9%) and increasing (76.0% of doctor's and first professional degrees in region):

	Percent Change 1970-71 to 1971-72
Law (5,279 degrees awarded in 1971-72)	21.7
Psychology (426)	19.0
*Education (1,5^6)	18.0
Business and management (190)	10.5
Health professions (4,053)	4.3
*Theology (1,526)	3.5

II. High share of nation's degrees (21.0% to 26.9%) but declining (7.3% of doctor's and first professional degrees in region):

Home economics (28)	-34.9
Biological sciences (782)	-4.8
Agriculture (224)	-3.9
Mathematics (227)	-3.8

III. Lesser share of nation's output (6.3% to 21.0%) but increasing (16.5% of doctor's and first professional degrees in region):

Library science (7)	600.0
*Public affairs and services (27)	237.5
*Area studies (14)	133.3
*Architecture and design (5)	66.7
*Computer and information sciences (20)	66.7
Fine and applied arts (97)	44.8
Foreign languages (130)	16.1
Social sciences (658)	8.0
Interdisciplinary studies (22)	4.8
Physical sciences (790)	3.8
Letters (416)	2.5
*Engineering (655)	2.3

IV. Lesser share of nation's output and declining:

Communications (7)	-30.0

*Classified similarly at both bachelor's and master's level.

of past employment projection efforts. But higher educational requests for appropriations may in the future need to be more strongly buttressed than have those of the past, and manpower studies are expected to come into greater prominence, not only for purposes of program justification, but also in the review of program justifications. It is reasonable to expect that the quality of available manpower information will be enhanced as it is increasingly tested in application.
